IHAKiralama Api Listesi

IHAKiralama uygulamasnn api listesinin açklamasn içermektedir.

1. Kategori

1.1 CREATE:

url = `/iha/category/`

type = "POST"

payload = {
"name": "test"
}

response_status_code = 201

1.2 LST

Kategori listesinin dönmesini salar. sme göre filtreleme yaplabilir.

url = `/iha/category/`

type = "GET"

response_body = [

    {

        "id": 1,

        "name": "test",

        "slug": "test",

        "created_at": "datetime",

        "updated_at": "datetime"

    }

]

1.3 RETREVE
Kategori detaynn getirilmesini salar.
url = `/iha/category/<id>`

type = "Get"

response_body =

    {

        "id": 1,

        "name": "test",

        "slug": "test",

        "created_at": "datetime",

        "updated_at": "datetime"

    }

1.4 UPDATE

Kategori slug' otomatik olarak oluturulmaktadr.

url = `/iha/category/<id>`

type = "PUT"

payload = {'name': 'aa', 'slug': 'aa'}

response_body =

{

"name": "test",

}

1.5 DELETE

url = `/iha/category/<id>`

type = "DELETE"

response_status_code = 204

2. MARKA

2.1 CREATE:

url = `/iha/brand/`

type = "POST"

payload = {
"name": "test",

"description": "test"
}

response_status_code = 201

2.2 LST

Marka listesinin dönmesini salar. sme göre filtreleme yaplabilir.

url = `/iha/marka/`

type = "GET"

response_body = [

    {

        "id": 1,

        "name": "test",

        "description": "test",

        "created_at": "datetime",

        "updated_at": "datetime"

    }

]

2.3 RETREVE
Marka detaynn getirilmesini salar.
url = `/iha/marka/<id>`

type = "Get"

response_body =

    {

        "id": 1,

        "name": "test",

        "description": "test",

        "created_at": "datetime",

        "updated_at": "datetime"

    }

2.4 UPDATE

url = `/iha/marka/<id>`

type = "PUT"

payload = {'name': 'aa', 'slug': 'aa'}

response_body =

{

        "name": "test",

        "description": "test"

}

2.5 DELETE

url = /iha/marka/<id>

type = "DELETE"

response_status_code = 204

3. IHA

3.1 CREATE:

Verilen payloaddaki bilgiler ile iha oluturulabilir. Image hariç

tüm alanlar zorunludur.

url = /iha/brand/

type = "POST"

payload =

    {

        "name": "test",

        "model_number": "test",

        "brand" : <id>,

        "category": [<id>]

        "image": binary,

        "weight": 49,

        "description": "iha"

    }

response_status_code = 201

3.2 LST

IHA listesinin dönmesini salar. sme göre filtreleme yaplabilir.

url = /iha/

type = "GET"

response_body = [

    {

        "name": "test",

        "model_number": "test",

        "brand" : object,

        "category": objects list,

        "image": binary,

        "weight": 49,

```
                              "description": "iha"

            }

     ]
```

3.3 RETREVE
IHA detaynn getirilmesini salar.
url = `/iha/<id>`

```
     type = "Get"
